

Purpose: To learn how to download and setup the mobile app for any iOS device.

Prerequisites:

- Moodle course or Moodle Sandbox.
- Pro or Basic license.
- An VoiceThread project link in a Moodle course or Moodle Sandbox
- iOS 5.1.1 minimum
- iPhone, iPod touch, iPad (Optimized for iPhone 5 - 6+)

The document is divided into 4 sections:

1. Finding and downloading the app
2. Initial Setup
3. Quick Start Create
4. Sharing

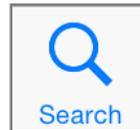

1. Finding and Downloading the App

Step 1: Turn on your iOS device (iPhone/iPod touch/iPad) and access main screen.

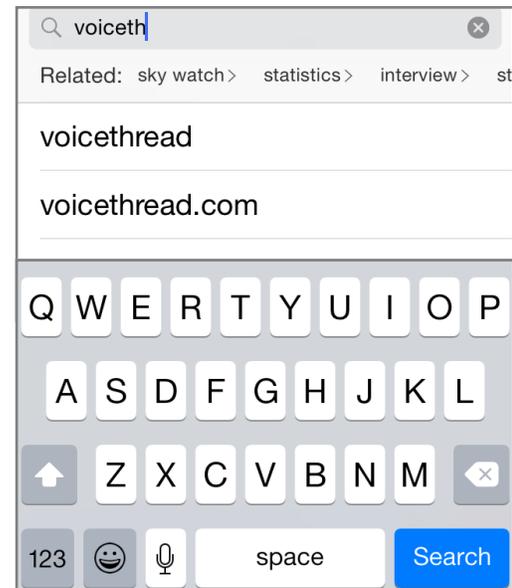

Step 2: Launch the App Store application.

Step 3: At the bottom of the screen, tap on Search.

Step 4: Type “voicethread”. Tap once on the word **VoiceThread** in the search results. This brings up the Informational page on VoiceThread.

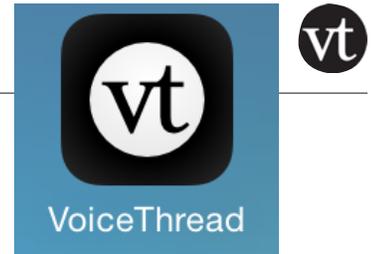

Step 5: At the informational page tap on **Get** and then tap on **Install**.

Before the app fully downloads you may be prompted to type in your iTunes credentials.

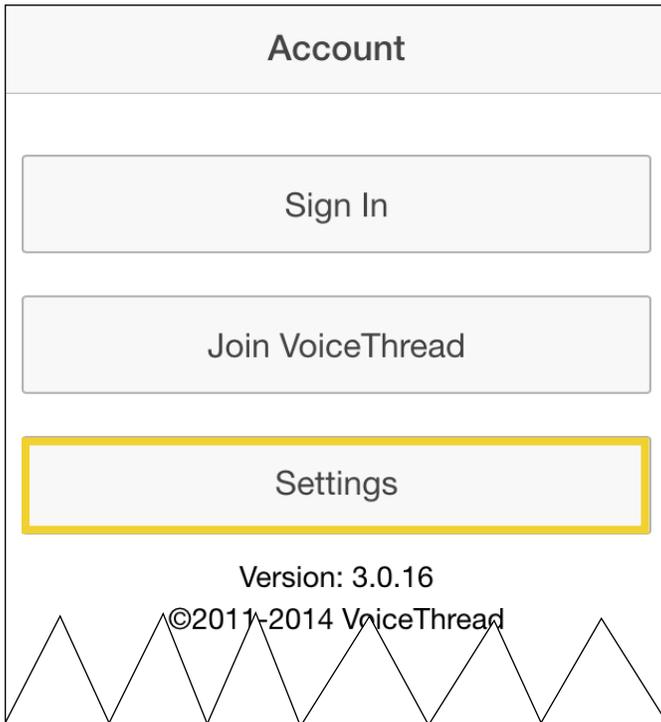

2. Initial Setup

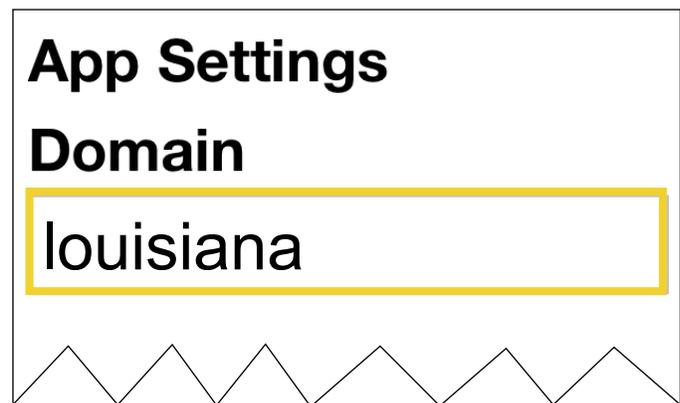

Step 1: Once downloaded, **tap** once on the icon to **boot up** the app.

Step 2: The Account screen will pop up. **Tap** the **Settings** button (see image below left).

Step 3: At the App Settings Domain screen **type** “louisiana” and then **tap** the **Save** button (see image below).

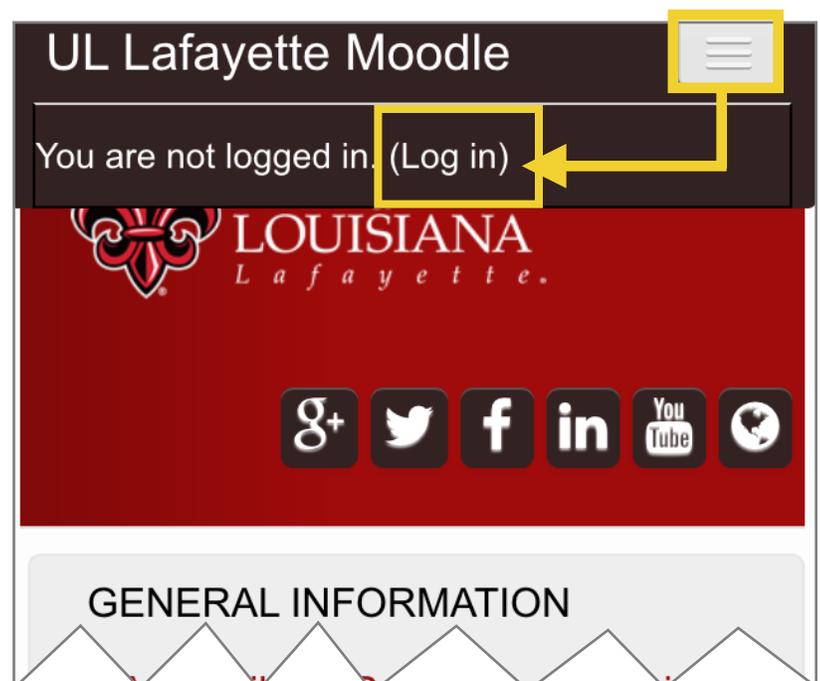

Step 4: Back at the Account screen, **tap** the **Sign In** button. (refer to the image above).

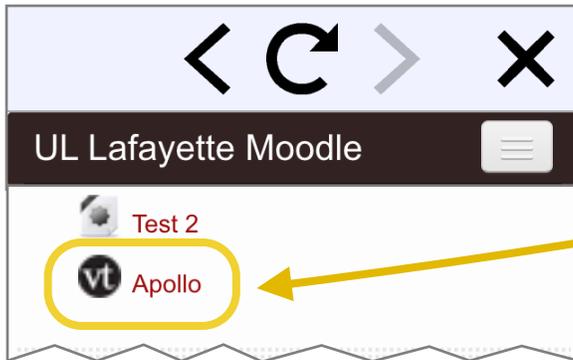

**Note that you only have to perform steps 2 - 4 the very first time. From then on, the app will remember your domain preference. You just need to Log In to Moodle.*

Step 5: The Moodle page will come up. Tap once on the 3Bar icon at the top right. Then **tap Log In** from the drop down menu.

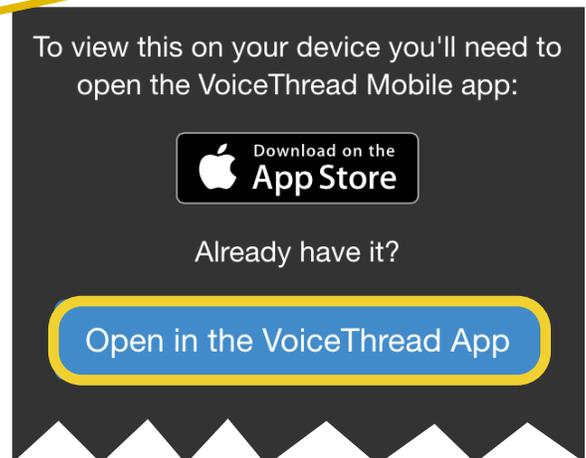

Step 6: **Log in** with your **credentials**.

Step 7: After log in, choose the Moodle course with the VT link and **tap the link.**

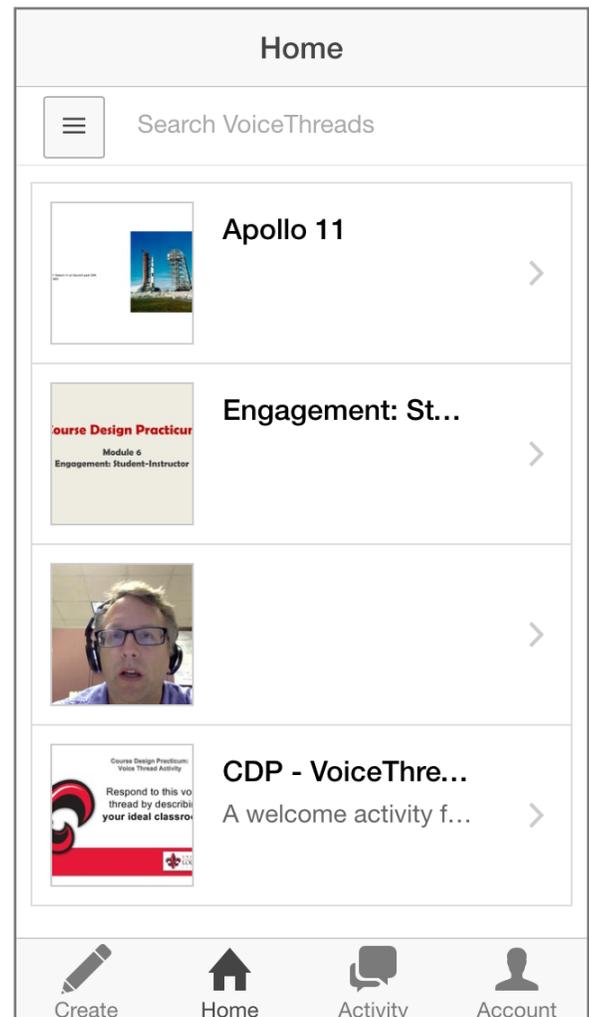

Step 8: As the link syncs with the VT servers you should see a screen that asks if you would like to use the mobile app (see image right). **Tap the Open in the VoiceThread App** button.

Step 9: The screen will refresh and the first card of the VT link you tapped on in step 8 appears. **Tap the X** at the top right screen to exit to bring you to your VT Home screen. *We exit this screen because the purpose was to activate the VT mobile app and to be at your VT Home screen.*

This brings you to the **Home** screen (see image to right). You can now access your previously created VT's or you can create new VT's on the fly using your mobile device (network connection necessary).

The next section covers how to make a quick mobile VT.

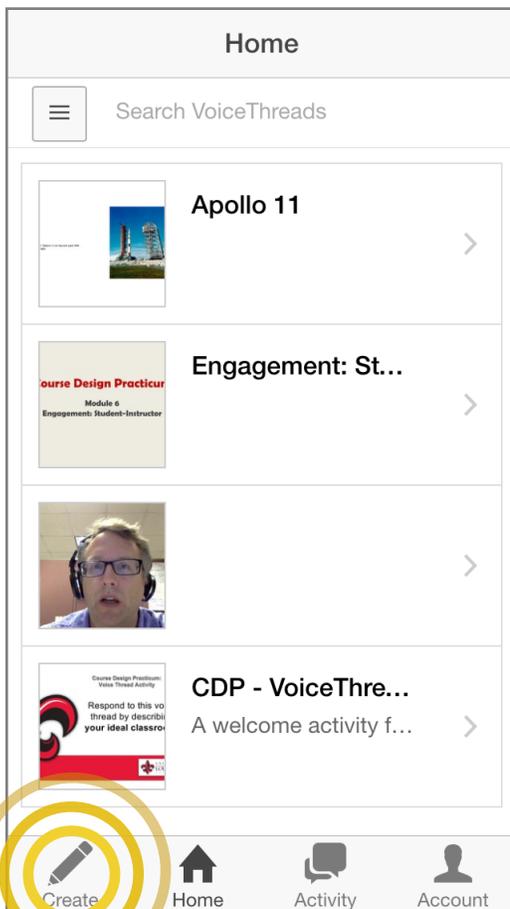

3. Quick Start Create

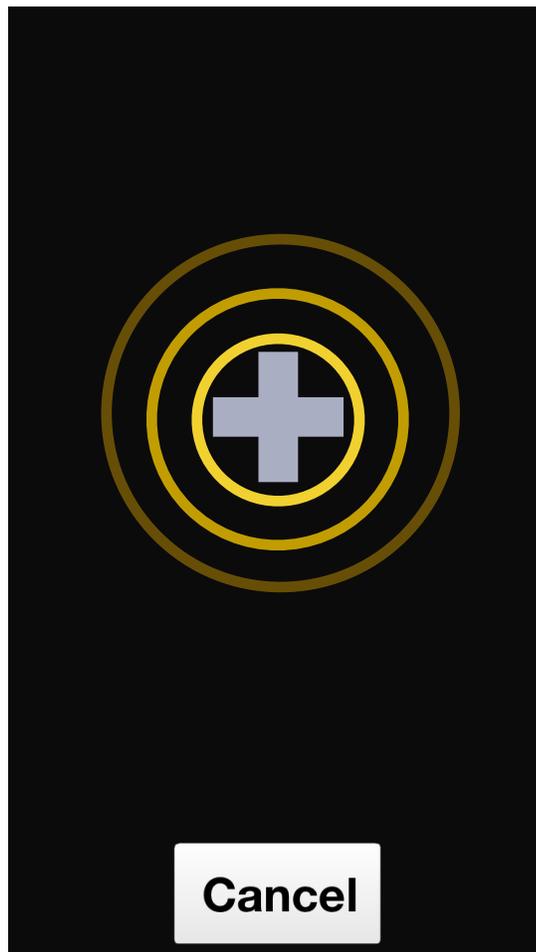

Here we will create a quick VT. I choose 3 pictures from the Photos app on the iOS device I was using.

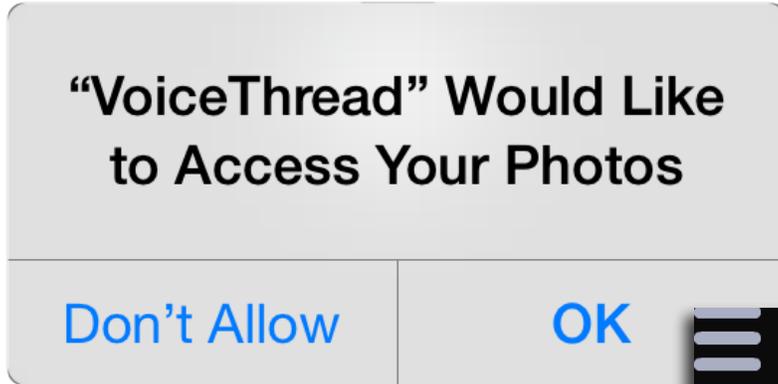

Step 1: At the bottom of your Home screen **tap** on **Create**.

Step 2: Tap on the **plus sign** to add a media file (see image below).

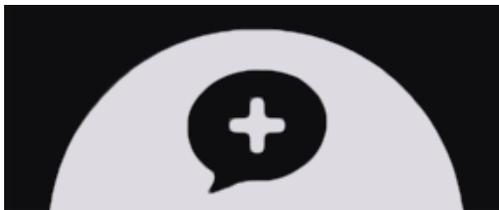

Step 3: Tap **OK** for the VT app to use your camera.

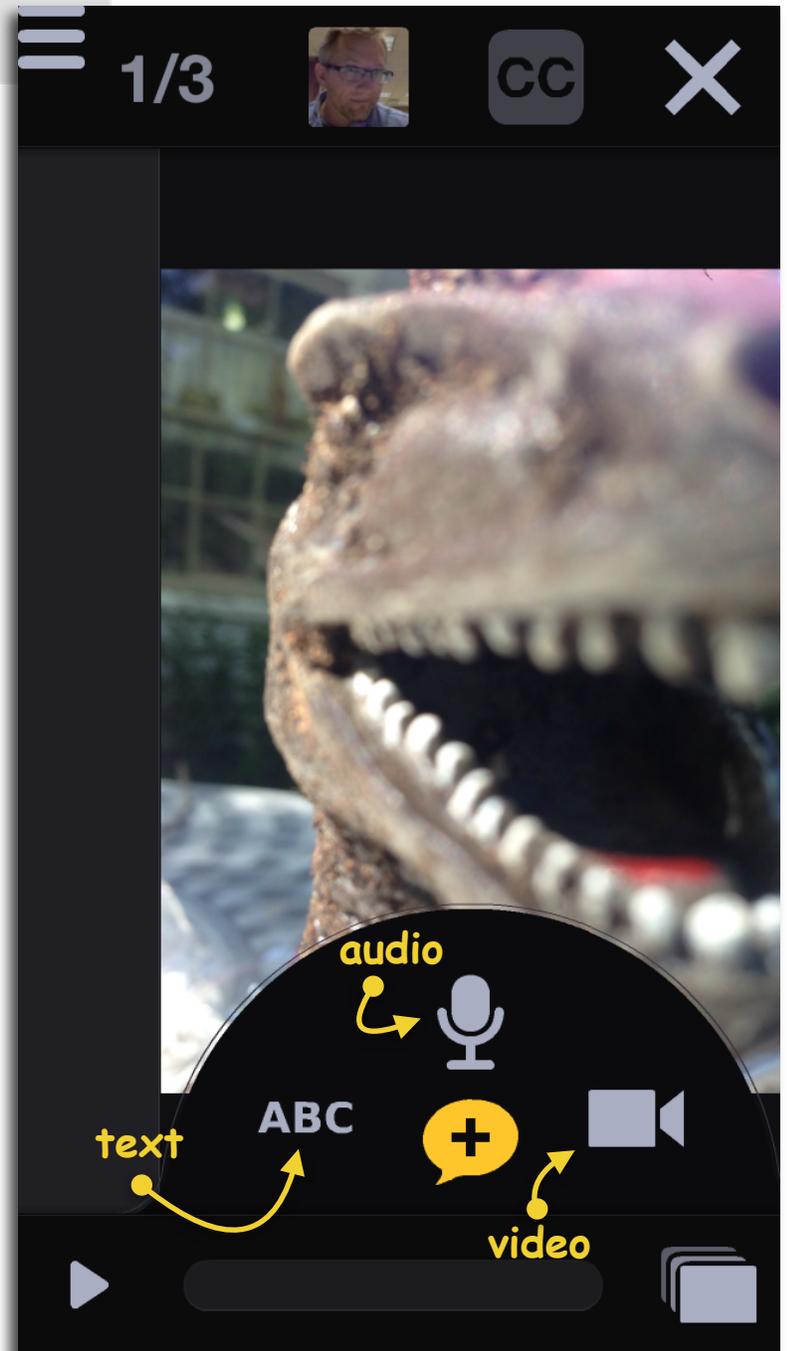

Step 4: Choose any photo you have previously taken from the gallery or shoot a new photo/video.

In the example to the right I chose a dinosaur photo. Once it loads **tap** on the **Add Comment icon** located at the bottom of the screen (see image directly below).

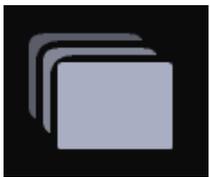

Text, audio or video comment tools will be presented (see image on right). This will be the “touchstone” comment you use to start the conversation.

Step 5: For the first image use the text tool. Tap on the **text icon** (ABC). A dialogue box comes up for you to type the comment you would like to leave. When done, tap on save.

All comments will autoplay once processed so it can be reviewed.

Step 6: Add a second card. Tap on the **New Card** icon (image below).

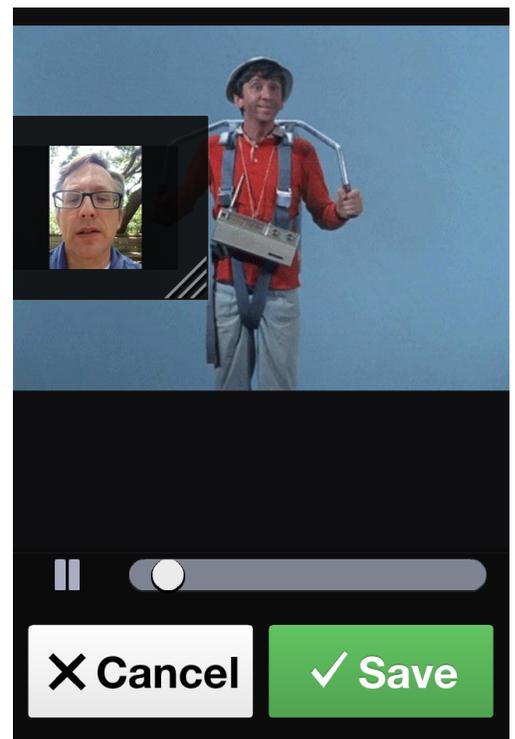

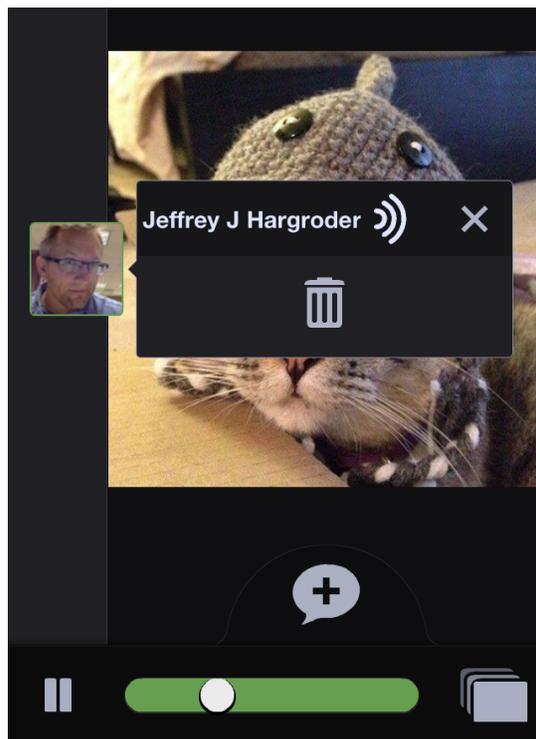

Step 7: Choose a **second photo** from your camera roll. This time use the **audio** for the second comment; then repeat one more time for the third image.

Step 8: Add a **third card**. Again **select** another **image** from your camera roll. This time **choose video** to make a comment.

The two cards on the right are examples of the two last cards.

The first screen (left) shows an audio comment that is playing back.

The second screen (right) shows an example of a video comment just before being saved.

Step 8: When you are done with all three cards, tap on the **X** at the top right corner.

4. Sharing

When a VT is completed the **Overview** screen appears (main image below). Here you can edit, delete, monitor, and most importantly, share.

Step 9: At the bottom left of the Overview screen, **tap** on the **Share** button.

Step 10: Tap the **VT Groups**.

Step 11: Choose which **course** to share. You are done.

The screenshot shows the VT Overview screen. At the top, there is a 'Back' button and a 'Home screen' label with a yellow arrow pointing to it. Below this is a profile picture and the date 'July 14, 2015'. The main content is a video thumbnail of a dinosaur's mouth with a play button overlay. Below the video, it says '0 Views · 0 Comments ·'. At the bottom of the video area, there are three buttons: 'Share', 'Bookmark', and 'Edit'. The 'Share' button is highlighted with a yellow box. To the left of the 'Share' button, a yellow box contains three sharing options: 'Email', 'Twitter', and 'VT Groups'. The 'VT Groups' option is highlighted with a yellow box. A yellow line connects the 'VT Groups' option to the 'Share' button. Below the 'VT Groups' box, a yellow box contains the text '3 ways to share your VT's.'. At the bottom of the screen, there is a navigation bar with four icons: 'Create', 'Home', 'Activity', and 'Account'. The 'Account' icon is highlighted with a yellow arrow. In the top right corner of the screen, there is a 'Sign Out' button highlighted with a yellow box.
