If you have previously used VoiceThread on Moodle 2.2 and you are now creating new VT’s on Moodle 2.7 you may get a “VoiceThread Account Verification” message. This message will appear after you have created the activity and then click on the link to setup your VoiceThread event. See image below.

People may hit this page if they have only ever accessed VT through the old Moodle integration (Moodle 2.2) and not through the new LTI in Moodle 2.7. When they come in through the new LTI integration for the first time, they will be prompted to verify their accounts. They can proceed by following these steps:

1. Click on the "Set it here" link at the bottom of the page.
2. Go through the steps to set a verification password for their accounts.
3. Return to this page and enter the password they just sent.

This should only be required the first time they make the "transition" to the new system.

If you continue to have issues please contact: Jefre@louisiana.edu.
